Krazy For Ketchup

KRAZY KETCHUP is revolutionizing America's favorite condiment. With the added organic veggie purees, a NUTRIENT TRIO, it is RICH in vitamin A, vitamin C and potassium, and high in fiber. Driven by concerns about Diabetes and sugar induced hyperactivity, organic agave nectar is a perfect substitute for sugar or high fructose corn syrup. Agave, a natural liquid sweetener made from the extract of the wild agave plant, has a relatively low glycemic index due to its higher proportion of fructose and lower levels of glucose. Not only does KRAZY KETCHUP contain these beneficial ingredients, current scientific study shows eating tomatoes and tomato products, North America's major source of lycopene (a carotenoid), reduces the risk for cancer. And further study from the USDA Research Publications has shown organic ketchups have higher levels of this cancer fighting

You can order directly from Krazyketchup.org \$6.99 for 15.5 oz bottle. However, would be best to go in with several other moms as the shipping cost are a little high 1-8 bottles flat rate of \$10.35.

MeetModernMoms would love to start a list of moms interested and arrange the purchase for the best rates possible.
